

AXIS Q1755 Network Camera

HDTV network camera with zoom and H.264.

- > HDTV image quality
- > Zoom and autofocus
- > Local storage
- > Power over Ethernet
- > Intelligent video capabilities

AXIS Q1755 is an outstanding HDTV camera, ideal for video surveillance systems where clear images and greater image detail are required. It is the perfect solution for securing areas where high quality identification is needed, such as airports, passport controls and casinos.

AXIS Q1755 Network Camera delivers HDTV performance in compliance with the SMPTE standard for installations that demand the highest resolution, perfect focus, good color representation and full frame rate. It delivers HDTV 1080i or 720p resolution, 16:9 aspect ratio and supports both H.264 and Motion JPEG in full frame rate.

AXIS Q1755 has 10x optical zoom, 12x digital zoom and autofocus and can provide the desired field of view immediately, in perfect focus.

The camera has a built-in slot for an SDHC card, enabling local storage of several days of recordings, without any external equipment.

Power over Ethernet (IEEE 802.3af) supplies power to the camera via the network, eliminating the need for power cables and reducing installation costs.

AXIS Q1755 offers intelligent capabilities such as enhanced video motion detection, audio detection, and alarm notification at tampering attempts such as blocking or spray-painting the camera. AXIS Q1755 also incorporates the Gatekeeper functionality which automatically zooms in when there is activity in the scene, and then zooms out after a preset time interval.
